Learning Entrance Exam by INFOTACT
Solutions

ACADEMIC PROJECT

House Rental Management System :

Designed and developed a Data-based House Rental Management System to store and manage tenant, owner, property, and rental details efficiently. Implemented database operations such as data insertion, updating, retrieval, and deletion using SQL to maintain accurate rental records and improve data management.

Real-Time Noise Level Detection and Voice Alert System :

Developed a low-cost smart noise monitoring system to detect and classify sound levels in real time. The system provides instant voice and LED alerts to help maintain a controlled and distraction-free environment in study and work areas.

Community Service Project :

Conducted community surveys on safe mobile browsing and social media awareness as part of a Summer Immersion Community Service Program, collecting and analyzing responses from people across different age groups and backgrounds.
